

Current reference system of the parts of the compounds:

			Referenced and reference is rendered online		Referenced but reference is not rendered online	Not referenced
			Via 1 st entry in the superentry	Via cross-reference (xr)	Via “gram type”	
NOUN as super-entry headword						
Possessed	ἄῶ= “head”			"#ἄῶἄ" “head”	-	-
Prep. + Noun	ἐξπρ- “toward”	<entry type=compound>	1 st entry in the superentry: ἔο “face”	-	-	Prep. ε, η
Prep. + Dem. + Noun	ντῆις “in this way”	<entry type=compound>	1 st entry in the superentry: ἔε “manner”	-	-	Prep. η + Dem. τῆι
Noun + Noun	ἡτόν νῆιτ “rest, satisfaction”	<entry type="compound">	1 st entry in the superentry: ἡτόν “be at rest”	-	<gram type="collocNoun">ῆιτ	-
Verb + Noun	πᾶοι “transport”	<entry type=compound> <subc> Kompositverb	1 st entry in the superentry: ᾶοι “ship, boat”	"#ῆις" “machen, tun”	-	-
Verb (stat.) + η + Noun	ο ηᾶο “be hunchbacked”	<entry type=compound>	1 st entry in the superentry: ᾶο “hunchback”	"#ῆις" “machen, tun”	-	-
Nom Pref. + η + Noun	ἡανᾶο “piece of wall”	<entry type=compound>	1 st entry in the superentry: ᾶο “wall”	-	-	Nom.pref.: ἡα
VERB as super-entry headword						
Pref. + Verb:	πῆῶ „singer, minstrel“	<entry type=compound>	1 st entry in the superentry: ᾶῶ “say, speak, tell”	-	-	Verbal prefix: πῆῶ
Verb + Preposit./Adverb:	ᾶι (ἡν-) “be concerned with”	<form type="compound"> ᾶι (ἡν-)	1 st entry in the superentry: ᾶι “receive, take”	-	<gram type="collocPrep">ἡν-</gram>	-
Verb + Preposit./Adverb:	ῆι ῆβολ “coming forth” (noun)	<entry type=compound>	1 st entry in the superentry: ῆι “come, go”	-	<gram type="collocAdv">ῆβολ</gram>	-

Currently compounds are referenced mostly via super-entry (except Verb (inf.) + Noun, which also contains reference to the verb). The idea is to reference ALL compound parts via <xr>, i.e. to make it independent from super-entry.

How to get compounds:

- 1) “form type=compound”
-> compounds of the type “Prefix + Verb” (**περῶμαι**) and “Verb + Preposit./Adverb” **αἰ** (**μην-**)
- 2) “entry type=compound”
-> compounds of the type “Prep. + Dem. + Noun” (**ἐξπρ-**), Prep. + Dem. + Noun (**ντῆς**), Noun + Noun (**ἡτον νῆς**), Verb + Noun (**πῶς**), Verb (stat.) + **ν** + Noun (**ο νῶς**), Nom Pref. + **ν** + Noun (**μανῶς**)
- 3) element “xr” present
-> cross-reference to compound parts (not systematically)
- 4) <subc>Kompositverb</subc>
-> with some compound verbs
- 5) <gram type="collocNoun">ῶ</gram>
-> with Noun + Noun compounds
- 6) <gram type="collocPrep">
-> with Verb + Preposition compounds
- 7) <gram type="collocAdv">
-> with Verb + Adverb compounds
- 8) “blank space” in text of <form> or <orth>
